PRIMARY EXAMINER

REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art Hoffman et U.S. Pat. No. 6,397,198 discloses a tokenless biometric identification computer system, comprising at least a database containing registered biometric sample of users.

JP 2001255956, Riyuu Gakuhei discloses a device/method for identifying user and recording medium.

However, neither Hoffman nor Riyuu singularly or in combination discloses the recited feature:

As per claims 1 and 63 "comparing the user-spoken verification identifier with a voice print of the user, and transmitting an authentication message to the computer if the user-spoken transaction identifier matches the computer-generated transaction identifier and if the user-spoken verification identifier matches the voice print".

As per claim 27 " a voice browser configured to receive and process user-spoken information from a second user-operated device, the voice browser being programmed to compare a user-spoken transaction identifier to a computer generated transaction identifier, and to compare a user-spoken verification identifier to a voice print of the user, and a session correlator coupled to the voice browser, the session correlator being configured to transmit an authentication message to the computer if the user-spoken transaction identifier matches the computer transaction identifier, and if the user-spoken verification identifier matches the voice print".

As per claim 65 "transmitting an authentication message to the web-site if the user-spoken transaction identifier matches the transaction identifier and if the user-spoken verification identifier matches the voice print, receiving at least one user-spoken command for controlling web-site navigation, the authentication system being programmed to convert the at least one user-spoken command into at least one computer-readable command, and transmitting the at least one computer-readable command to the web-site, the at least one computer-readable command being executed by the web-site, whereby the user controls web-site navigation of the web-site by the at least one user-spoken command".
